

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A digital broadcast receiving system comprising:

a receive and demodulation section by which a digital broadcast signal received from the exterior is demodulated and outputted as a packet stream;

a packet filter that filters a predetermined packet in a plurality of packets composing said packet stream;

a record and reproduction unit by which said packet stream passing through said packet filter is recorded, and said recorded packet stream is reproduced and outputted;

an information table generator that generates, with respect to a first specific information table in various information tables contained in said packet stream, a new first specific information table containing information only on a program to be recorded in said record and reproduction unit; and

an information table substitution unit by which said new first specific information table is substituted for an information table corresponding to said first specific information table contained in said packet stream transmitted,
